RESULT 53 US-09-336-447A-76 ; Sequence 76, Application US/09336447A

```
GENERAL INFORMATION:

APPLICANT: HANSEN, ERIC J.

APPLICANT: AEBI, CHRISTOPH

APPLICANT: COPE, LESLIE D.

APPLICANT: MACIVER, ISOBEL

APPLICANT: FISKE, MICHAEL J.

APPLICANT: FREDENBURG, ROSS A.

ITITLE OF INVENTION: USPA1 AND USPA2 ANTIGENS OF MORAXELLA CATARRHALIS

FILE REFERENCE: AMCY:024

CURRENT APPLICATION NUMBER: US/09/336,447A

CURRENT FILING DATE: 1999-06-21

NUMBER OF SEQ ID NOS: 98

SOFTWARE: PACENTIN Ver. 2.1

SEQ ID NO 76

LENGTH: 3788

TYPE: PRT

ORGANISM: MORAXEL1a Catarrhalis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  FEATURE:
